

Revpro™

Recycled Can Liners

Revolution®
redefine possible.

Tough as nails, Green as grass.

Revpro™ certified recycled content can liners for every type of commercial or industrial need

High Performance, Exceptional Value

Revpro™ liners deliver high performance at an exceptional value

Quality You Can Count On

Made with the highest quality, pre-consumer recycled resin

Achieve Your Sustainability Goals

Certified eco-friendly to help you reduce your carbon footprint and meet your sustainability goals

Flexible Order Quantities

Small business-friendly with low order quantity requirements (LTL)

Stocking Programs Available

Qualified customers may be eligible for unique stocking programs

Made with Certified Recycled Content

Revpro can liners are third-party certified by SCS Global Services to contain a minimum of 84-95% pre-consumer recycled content, ensuring peace of mind that you're getting the highest quality product made with eco-friendly materials.

Capabilities

PREMIUM CAN LINER PUT UP

- Coreless rolls
- Cored rolls
- Flat pack

PACKAGING

- Strong corrugated boxes
- Customized labeling
- Pallets are delivered with a dust cover

CONSTRUCTION OF PREMIUM CAN LINERS

- Star, flat, or gusset bottom seal
- Tubular design — no side seam
- 1 mil to 6 mil

COLORS & PRINTING

- Any color
- Tint or opaque
- Random print

Seal Styles

STAR SEAL

Star seal can liners are manufactured by folding the bottom of the liner over twice and then sealing it. These can liners will virtually eliminate leaks, and conform better to the shape of the waste receptacle by spreading refuse around the can liner.

GUSSET SEAL

Gusset sealed is a flat style can liner that is manufactured with both sides tucked in to form gussets. The outer edges of the can liner where there are indentations is sealed with four layers of film, while the middle is sealed with only two layers. Can liners made with gussets work best in rectangle-shaped cans.

FLAT SEAL

A Flat seal can liner is manufactured by simply sealing the bottom edge. Can liners made with this type of seal are leak-proof and do not compromise the length of the can liner. Can liners made with a flat seal do not conform as well to the waste receptacle.

Measuring Guide

Circumference = Diameter multiplied by 3.14

Circumference = Sum of all 4 sides added together

BAG WIDTH: To calculate the proper width of the can liner for your container, simply divide the circumference of your container by 2

SQUARE CONTAINER CIRCUMFERENCE:

Circumference = sum of all 4 side added together

ROUND CONTAINER CIRCUMFERENCE:

Circumference = diameter multiplied by 3.14

BAG LENGTH: (For both square and round containers)

Add the height of the container, plus 4 - 5 inches for overhang

redefine possible

At Revolution™, we're redefining what's possible with a unique approach to sustainability that embraces the entire plastics life cycle.

In addition to making high quality plastics for commercial applications, we also collect and recycle plastic film materials to create a continuous circle of sustainability.

This holistic approach to production delivers effective, scalable solutions that meet your needs today, while helping you adopt more sustainable practices for the future.
