

Silage & Grain Bags

Built for Harvest. Designed for Sustainability.

High-performance Silage & Grain Bags engineered for strength, consistency, and recyclability.

Revolution's Silage & Grain Bags are built to perform in the toughest agricultural environments. Designed with durability and flexibility in mind, our multi-layer film technology protects your valuable feed and grain while supporting a sustainable future with recyclability through Revolution's collection program.

Key Features & Benefits

- ✓ Superior Strength & Puncture Resistance**
Engineered to handle the pressure of heavy loads and variable climates.
- ✓ UV-Stabilized Protection**
Provides long-lasting field performance and reliable feed preservation.
- ✓ Consistent Stretch & Seal**
Ensures uniform filling, smooth unrolling, and tight sealing for maximum efficiency.
- ✓ Designed for Recyclability**
Manufactured using high-quality polyethylene film that can be recovered and reused.
- ✓ Available in Multiple Sizes**
Offered in a wide range of diameters and lengths to fit your equipment and storage needs.
- ✓ Made in the USA**
Proudly made in the USA and supporting our local economy.

Product Stats

	Material High-strength polyethylene film		Width Up to 12'+ diameter		Length 100' - 500'		Gauge 6mil - 9.5mil		Color White with black interior		UV Rating Up to 24 months under normal circumstances		Recyclability Recyclable through Revolution's agricultural film network

Revolution®

From Farm to Future: Closing the Loop

Revbag™

Your Silage & Grain Bags don't end in the field - they begin a new life as RevBag can liners when recycled through our collection program.

At Revolution, sustainability isn't an afterthought – it's at the core of what we do. When you recycle your used Silage & Grain Bags through our nationwide collection network, we process that material and give it a new purpose as RevBags – durable, high-quality trash can liners made from recycled agricultural film.

Our Process

Made for Sustainability

Our Silage & Grain Bags collected through our recycling program are processed and repurposed domestically, supporting a cleaner and more sustainable circular economy.

Powered by Revolution's Closed-Loop System

We manage every step of the process for materials returned through our collection program — from collection and reprocessing to manufacturing — to keep as much material as possible in the loop.

The Same Strength, Reimagined

RevBag can liners are engineered for the same toughness and reliability trusted in agricultural use, and are made with recycled agricultural film collected through our program — reimagined for everyday commercial use.
