RevNetting

Garden & Wildlife Protection Netting

RevNetting is a durable protection netting built for **garden beds, landscaping, crop protection, and wildlife exclusion** — keeping deer, rabbits, and birds away from plants, vegetables, and fruit. Lightweight 7 ft rolls install quickly with stakes, posts, and ties.

Excellent Performance

UV-treated extruded mesh construction engineered to stand up to weather, wildlife pressure, and season-after-season garden use — at a full 7 ft height for effective deer exclusion.

Effective Wildlife Barrier

Sized and meshed to deter deer, rabbits, and birds from gardens and produce.

Full 7 ft Height

The standard residential-perimeter height for discouraging deer from jumping.

Fast Installation

Lightweight rolls install easily with stakes, posts, and ties.

Garden-Ready Colors

Black and Green blend naturally into planting beds and landscape.

UV Treated

Formulated for continuous outdoor exposure through the growing season.

Won't Rust or Rot

Plastic mesh holds up in wet ground and irrigation where metal fencing corrodes.

APPLICATIONS

- **Deer & Wildlife Exclusion** — keeps deer, rabbits, and other animals away from gardens and landscaping.
- **Garden Bed Protection** — shields vegetables, fruit, and flowers from birds and pests.
- **Crop Protection** — row, bed, and small-plot protection for growers and market gardens.
- **Landscape & Perimeter Netting** — general-purpose barrier for yards, beds, and small enclosures.

AVAILABLE SIZES & COLORS

HEIGHT	LENGTH	COLOR	BEST FOR
7 ft	100 ft	■ Black	Perimeter runs — most discreet
7 ft	100 ft	■ Green	Landscape & planting beds
7 ft	50 ft	■ Black	Single beds & small plots
7 ft	50 ft	■ Green	Landscape & planting beds

Recommended sizes and colors reflect Revolution's review of standard market offerings and are pending final confirmation. RevNetting

Product Specifications & Installation

PRODUCT SPECIFICATIONS

Product type	Extruded plastic mesh protection netting
Application	Garden and crop protection, wildlife exclusion, perimeter netting
Target species	Deer, rabbits, birds, and other garden wildlife
Roll height	7 ft
Roll lengths	50 ft, 100 ft
Standard colors	Black, Green
Material	Blend of prime and post-consumer recycled (PCR) resin
Weather resistance	UV treated for continuous outdoor exposure; will not rust or corrode
Reuse & end of life	Designed for multi-season take-down, storage, and reuse; recyclable
Fastening	Stakes, posts, and ties

Mesh opening dimensions, roll weight, tensile strength (MD/TD), and recommended post spacing are published in the **RevNetting Technical Data Sheet** — contact your representative for the current release.

INSTALLATION

Set the line first	Place stakes or posts along the full run before unrolling.
Use the full height	Install at the full 7 ft — trimming reduces deer-exclusion effectiveness.
Tension	Unroll taut between supports and tie off at each post, top and bottom.
Close the bottom gap	Stake the bottom edge flush to the ground, where deer and rabbits push under.
Inspect through season	Walk the line periodically and free any small animal that becomes caught.

MADE WITH RECYCLED CONTENT

Every roll is formulated with a blend of prime and post-consumer recycled (PCR) resin and is recyclable at end of life. Ask your representative about pairing RevNetting with a Revolution film collection program.

AVAILABILITY & ORDERING

RevNetting is available in the sizes and colors listed above. Contact your Revolution representative for current availability, minimum order quantities, pallet configurations, and lead times.
